INDEPENDENT AUDITOR'S REPORT

To The Board of Directors of Tri-K Industries, Inc.

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of Tri-K Industries, Inc. ("the Company"), prepared for the purpose of inclusion in consolidated financial statements of Galaxy Surfactants Limited ("Holding Company") which comprise the Balance Sheet as at 31 March 2020, and the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2020, and its profit total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the preparation of these standalone financial statements, prepared for the inclusion in the consolidated financial statements of the Holding Company that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Gr.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

- 1. Based on our audit we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the relevant books of account maintained for the preparation of Ind AS financial statements.
 - c) In our opinion, the aforesaid standalone financial statements comply with the Ind AS specified under Section 133 of the Act.

Restriction in Use

The report is provided solely for the information and the purpose of preparation of Consolidated Financial Statements of the Galaxy Surfactants Limited Group for the year ended March 31, 2020. It should not be distributed to any other third party prior our written consent.

1.

A. Corporate Information

TRI-K Industries, Inc. was incorporated on March 22, 1974 under the laws of the State of New Jersey vide certificate of incorporation bearing NJCorp number 8948946400 as "TRI-KEM INC" which was subsequently changed to "TRI-K Industries, Inc." on November 19, 2008. The registered office of TRI-K Industries, Inc. is situated at 2, Stewart court, Denville, New Jersey 07834, USA. TRI-K Industries, Inc. became a subsidiary of Rainbow Holdings GmbH with effect from July 01, 2009 and an associate company of Galaxy Holdings (Mauritius) Limited with effect from March 25, 2010. By virtue of the above, TRI-K Industries, Inc. has become 100% step down subsidiary of Galaxy Surfactants Limited with effect from March 25, 2010.

TRI-K Industries, Inc. is currently engaged, inter alia, in the business of sourcing, manufacturing and distributing a broad range of cosmetic ingredients and technologies for the global cosmetic and personal care industry and manufacture of proteins having manufacturing location at New Hampshire.

COVID-19 Assessment

The COVID-19 pandemic is rapidly spreading throughout the world and impacted the businesses, however the plant of the Company was in operation and not closed during this time for COVID-19 reasons. The Company has evaluated impact of this pandemic on its business operations and financial position and based on its review of current indicators of future economic conditions, there is no significant impact on its financial statements as at 31st March 2020. However, the impact assessment of COVID-19 is a continuing process given the uncertainties associated with its nature and duration and accordingly the impact may be different from that estimated as at the date of approval of these financial statements. The Company will continue to monitor any material changes to future economic conditions.

B. Significant accounting policies

a) Statement of compliance

These Standalone financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules 2015 as amended and notified under Section 133 of the Companies Act, 2013 (the "Act") and other relevant provisions of the Act.

b) Basis of preparation and presentation

The financial statements are prepared in accordance with the historical cost basis, except for certain financial instruments that are measured at fair values, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair Value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and / or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of Ind AS 116 – Leases, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 – Inventories or value in use in Ind AS 36 – Impairment of Assets.

The principal accounting policies are set out below

c) Revenue Recognition:

Revenue from contract with customers is recognised when the Company satisfies performance obligation by transferring promised goods to the customer. Performance obligations are satisfied at the point of time when the customer obtains controls of the asset.

Revenue is measured based on transaction price, which is the fair value of the consideration received or receivable, stated net of discounts, returns and value added tax. Transaction price is recognised based on the price specified in the contract, net of the estimated sales incentives/ discounts. Accumulated experience is used to estimate and provide for the discounts/ right of return, using the expected value method.

Other Income

N N

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

d) Property, Plant and Equipment:

Property, Plant and Equipment are stated at cost of acquisition or construction less accumulated depreciation and impairment losses, if any. The cost of Property, Plant and Equipment comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes, any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying asset up to the date the asset is ready for its intended use. Subsequent expenditure on fixed assets after its purchase / completion is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the Statement of Profit and Loss.

Depreciation on these assets commences when assets are ready for their intended use which is generally on commissioning. Items of Property Plant and Equipment are depreciated in a manner that amortises the cost of the assets after commissioning less its residual value, on a straight line basis over their useful lives at the following rates:

Description	Estimated useful lives (No. of Years)
Leasehold Improvements	As per lease agreement
Machinery & Equipment	5-10
Furniture and fixtures	7
Computers and equipment	3-5
Building	39
Freehold Land is not depreciated.	

Depreciation on additions/deletions during the year is provided on pro-rata basis from/up to the month of such addition/deletion.

Property, plant and equipment's residual values and useful lives are reviewed at each Balance Sheet date and changes, if any, are treated as changes in accounting estimate.

e) Intangible Assets:

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives so as to reflect the pattern in which the assets economic benefits are consumed. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. The amortisation of intangible asset is included in Depreciation and amortisation expense in statement of profit & Loss account.

Amortization of intangibles is provided using the straight-line method at the following useful lives:

Description	Estimated useful lives (No. of Years)
Customer relationships	10
Computer software	3

Goodwill:

In the erstwhile GAAP (USGAAP), the Company had elected the accounting standard that permitted private companies to amortize goodwill on a straight line basis over ten years or a shorter period if management determines it is more appropriate. Under Ind AS, the Company has stopped amortisation of such goodwill from the date of transition (April 1,2016). From April 1, 2016, such un-amortised Goodwill is not amortised, but is tested at the entity level for impairment when a triggering event occurs that indicates that the fair value of the entity unit may be less than its carrying amount. Any impairment would be recognized for the difference between the fair value of the entity unit and its carrying amount.

Reseorch & Development:

Revenue expenditure pertaining to research is charged to the Statement of Profit and Loss. Development costs of products are also charged to the Statement of Profit and Loss unless a product's technical and economic feasibility and marketability has been established, in which case such expenditure is capitalised. The amount capitalised comprises expenditure that can be directly attributed or allocated on a reasonable and consistent basis to creating, producing and making the asset ready for its intended use. Property, Plant and Equipment utilised for research and development are capitalised and depreciated in accordance with the policies stated for Property, Plant and Equipment.

f) Inventories:

Inventories comprise all costs of purchase, conversion and other costs incurred in bringing the inventories to their present location and condition.

Raw materials and bought out components are valued at the lower of cost or net realisable value. Cost is determined on the basis of the weighted average method.

by

Finished goods produced and purchased for sale, manufactured components and work-in-progress are carried at cost or net realisable value whichever is lower.

Stores, spares and tools other than obsolete and slow moving items are carried at cost. Obsolete and slow moving items are valued at cost or estimated net realisable value, whichever is lower.

g) Leases:

The Company as a lessee

The Company's lease asset classes primarily consist of leases for buildings and premises. The Company assesses whether contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense over the term of the lease.

The right-of-use assets are initially recognized at cost, they are subsequently measured at cost less accumulated depreciation and impairment losses. Right-of-use assets are depreciated from the commencement date on a straight line basis over the shorter of the lease term and useful life of the underlying asset. The lease liability is initially measured at amortized cost at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates in the country of domicile of these leases.

Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

The Company as a Lessor

Leases for which the Company is a lessor is classified as a finance or operating lease. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

h) Foreign exchange transactions and translations:

Transactions in foreign currencies i.e. other than the Company's functional currency of US Dollars are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange differences on revaluation are recognised in profit or loss in the period in which they arise.

TRI-K INDUSTRIES Inc.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31^{5T} MARCH 2020

i) Employee Benefits:

Employee benefits include compensated absences.

Defined contribution plons

The Company's contribution to 401(K) plan and Medical benefits are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made.

The Company has a profit sharing plan that covers employees who have completed at least 1,000 hours of service during the plan year and are employed on the last day of the plan year. The plan provides for discretionary contributions as determined by the board of directors. There were no contributions to the profit sharing plan for the years ended March 31, 2020 and 2019.

The Company has a 401(k) Plan to provide retirement and incidental benefits for its employees. Employees may elect to contribute a percentage of their annual compensation to the Plan, limited to a maximum annual amount as set periodically by the Internal Revenue Service. The Company matches employee contributions in an amount equal to (i) 100% of the employee contributions that are not in excess of 3% of compensation, plus (ii) 50% of the amount of the employee contributions that exceed 3% of the compensation but do not exceed 5% of compensation. All matching contributions vest immediately.

In addition, the Plan provides for discretionary contributions as determined by the board of directors. Company matching contributions to the Plan total \$196,628 and \$227,088 for the years ended March 31, 2020 and 2019, respectively. No discretionary contributions were made in the years ended March 31, 2020 and 2019.

Defined benefit plons - Short term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries and annual leaves in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service. These benefits are unfunded.

j) Borrowing Costs:

All borrowing costs are charged to the Statement of Profit and Loss except:

- Borrowing costs that are attributable to the acquisition or construction of qualifying tangible and
 intangible assets that necessarily take a substantial period of time to get ready for their intended
 use, which are capitalised as part of the cost of such assets.
- Expenses incurred on raising long term borrowings are amortised using effective interest rate method over the period of borrowings.

k) Taxes on Income

The Company utilises the asset and liability method of accounting for income taxes. Under the asset and liability method, deferred income taxes are recognized for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. Deferred income taxes result primarily from temporary differences related to inventories, accounts receivable, net property and equipment, goodwill and other intangible assets for financial and income tax reporting. The deferred tax assets and liabilities represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Deferred tax expense or benefit is recognized as a result of the change in the deferred tax assets or liabilities during the year. Based on consideration of all available evidence regarding their

γð

utilization, net deferred tax assets are recorded to the extent that it is more likely than not that they will be realized. Where, based on the weight of all available evidence, it is more likely than not that some amount of a deferred tax asset will not be realized, a valuation allowance is established for that amount that, in management's judgment, is sufficient to reduce the deferred tax asset to an amount that is more likely than not to be realized.

The authoritative guidance prescribes a minimum probability threshold that a tax position must meet Before a financial statement benefit is recognized. The minimum threshold is defined as a tax position that is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any related appeals or litigation, based solely on the technical merits of the position. The tax benefit to be recognized is measured as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. At March 31, 2020 and 2019, the Company has not recognized any uncertain tax benefits in the financial statements. There are no material tax related interest or penalties included in these financial statements. Taxes on income comprises of current taxes and deferred taxes.

I) Impairment of Assets:

The carrying values of assets / cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the net selling price and their value in use. Value in use is arrived at by discounting the future cash flows to their present value based on an appropriate pre-tax discount rate to determine whether there is any indication that those assets have suffered any impairment loss. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss, except in case of revalued assets.

m) Provisions and Contingent Liabilities:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. In the event the time value of money is material provision is carried at the present value of the cash flows required to settle the obligation.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

n) Financial instruments, Financial assets, Financial liabilities and Equity instruments:

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the relevant instrument

γð

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities measured at fair value through profit or loss) are added to or deducted from the fair value on initial recognition of financial assets or financial liabilities. Transactions costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Classification and subsequent measurement Financial Assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place. All recognised financial assets are subsequently measured at either amortised cost or fair value depending on their respective classification

On initial recognition, a financial asset is classified as measured at -

- Amortised cost; or
- Fair Value through Other Comprehensive Income (FVTOCI); or
- Fair Value Through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL. This includes all derivative financial assets.

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain and loss on de-recognition is recognised in profit or loss.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVTOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognised in Other Comprehensive Income and accumulated in the reserves. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for medium or long-term strategic purpose. Upon the application of Ind AS 109, the Company has chosen to designate these investments as at FVTOCI as the Company believes that this provides a

more meaningful presentation for medium or long-term strategic investments, than reflecting changes in fair value immediately in profit or loss. Dividend income received on such equity investments are recognised in profit or loss.

Equity investments that are not designated as measured at FVTOCI are designated as measured at FVTPL and subsequent changes in fair value are recognised in profit or loss.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company is recognised at the proceeds received, net of directly attributable transaction costs.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held-for-trading or it is a derivative or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Compound instruments

An issued financial instrument that comprises of both the liability and equity components are accounted as compound financial instruments. The fair value of the liability component is separated from the compound instrument and the residual value is recognised as equity component of financial instrument. The liability component is subsequently measured at amortised cost, whereas the equity component is not remeasured after initial recognition. The transaction costs related to compound instruments are allocated to the liability and equity components in the proportion to the allocation of gross proceeds. Transaction costs related to equity component is recognised directly in equity and the cost related to liability component is included in the carrying amount of the liability component and amortised using effective interest method.

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

the Company enters into transactions whereby it transfers assets recognised on its balance sheet, ч**у** п п

but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Financial guarantee contracts and loan commitments

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts and loan commitments issued by the Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- The amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- The amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 18.

Impairment of financial assets

The Company applies the expected credit loss (ECL) model for recognising impairment loss on financial assets. With respect to trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. For all other financial instruments, the Company recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12 month ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition. 12 month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date. Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying

amount of the assets.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write- off. However, financial assets that are written off could still be subject to enforcement activities under the Company recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

o) Use of Estimates and judgement:

The preparation of financial statements in conformity with Ind-AS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the results of operations during the reporting period end. Although these estimates are based upon management's best knowledge of

bg

9

current events and actions, actual results could differ from these estimates

The estimates and underlying assumptions are reviewed at the end of each reporting period. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Estimation of uncertainties relating to the global health pandemic from COVID-19 (COVID-19):

The Company has considered the possible effects that may result from the pandemic relating to COVID-19 on the carrying amounts of Trade Receivables and Inventories. In assessing recoverability of trade receivables, the Company has considered subsequent recoveries, past trends, credit risk profiles of the customers based on their industry, macroeconomic forecasts and internal and external information available up to the date of issuance of these financial statements. In assessing the recoverability of inventories, the Company has considered the latest selling prices, customer orders on hand and margins. Based on the above assessment, the Company is of the view that carrying amounts of trade receivables and inventories are expected to be realisable. The impact of COVID-19 may be different from that estimated as at the date of approval of these financial statements, and the Company will continue to closely monitor the developments.

Critical accounting judgements and key source of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Useful lives of property, plant ond equipment and intangible assets

As described in the significant accounting policies, the Company reviews the estimated useful lives of property, plant and equipment and intangible assets at the end of each reporting period. Useful lives of intangible assets is determined on the basis of estimated benefits to be derived from use of such intangible assets. These reassessments may result in change in the depreciation /amortisation expense in future periods.

Fair value measurements and valuation processes

Some of the Company's assets and liabilities are measured at fair value at each balance sheet date or at the time they are assessed for impairment. In estimating the fair value of an asset or a liability, the Company uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Company engages third party valuers, where required, to perform the valuation. Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities require estimates to be made by the management and are disclosed in the notes to the financial statements.

Receivables and Credit Policies

Accounts receivable are uncollateralized customer obligations due under normal trade terms which are generally up to ninety days from the invoice date. Accounts receivable are stated at the amount billed to the customer. Customer account balances with invoices exceeding credit terms are considered delinquent. Payments of accounts receivable are allocated to the specific invoices

bg

identified on the customer's remittance advice or if unspecified are applied to their earliest unpaid invoices. The Company's accounts receivable are reduced by a valuation allowance that reflects management's best estimate of the amount that will not be collected. Management individually reviews all accounts receivable balances that exceed credit terms and based on an assessment of current credit worthiness, estimates the portion if any of the balance that will not be collected. The need for a reserve is also evaluated periodically by management.

TOTAL	7,640,742	10,578,837

7.1 The cost of Inventories recognised as an expense during the year in respect of continuing operations was \$30,638,801/- (for the year ended Merch 31, 2019 : \$ 26,882,693/-)

7.2 The cost of Inventories recognised as an expense includes \$109,397/- (During 2018-19 : \$ 143,512/-) in respect of write downs of inventory to net realisable value, and has been reduced by \$57,090/- (During 2018-19 :\$216,188/-) in respect of the reversal of such write downs.

7.3 The Company determines the realisable value of inventory based on the latest selling prices, customer orders on hand and margins, adjusted to reflect current and estimated future economic conditions also teking into account estimates of possible effect from the pandemic relating to COVID-19.

27 Segment Information

The Operating Segments have been reported in a manner consistent with the internal reporting provided to the whole-time directors, who are the Chief Operating Decleton Makers. They are responsible for allocating resources and assessing the performance of operating segments. Accordingly, the reportable segments is only one segment i.e. home and personal care ingredients.

Revenue from Type of Product and Services

There is only one operating segment of the company which is based on nature of product. Hence the revenue from external customers shown under geographical information is representative of revenue based on product and services,

35 Financial Risk Management Framework

The company has reviewed a risk management framework with the board, so as to devalop an approach to identify, assess and manage the various risks associated with our business activities in a systematic manner. The framework lays down guiding principles on proactive planning for identifying, analysing and mitigating material risks, both external and internal, and covering operational, financial and strategic risks. After risks have been identified, risk mitigetion solutions are determined to bring risk exposure levels in line with risk appetite. The Companies business activities are exposed to a variety of financial risks, namely Credit risk, Liquidity risk, interest risks and Commodity price risk.

A. Market Riek

The Company's size and operations result in it being exposed to the market risks that arise from its use of financial instruments namely Currency risk, Interest risks and Commodity price risk. These risks may affect the Company's income and expanses, or the value of its financial Instruments. The Company's exposure to and management of these risks are explained below.

Interest Rate Risk

There are no outstanding loans in the books of the company however the company does have an aveilable line of credit of \$7,500,000.

ii Commodity Risk

The company is exposed to the price risk associated with purchasing of the raw materials. The company typically do not enter into formal long term arrangements with our vendors. Therefore, fluctuations in the price and availability of raw materials may effect the companies business and results of operations. Manegement reviews the commodity price risk regularly to avoid material impact on profitability of the company. There are no direct commodity derivatives available to hedge the price risk associated with the major raw material.

B. Credit Risk Management

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables. The Company's customer base majorly has creditworthy counterparties which limits the credit risk. The companies exposures are continuously monitored and wherever necessary we take advances to minimise the risk.

C. Trade Receivables and Advances

The Company epplies the simplified approach to provide for expected credit losses prescribed by Ind AS 109, which pormits the use of the lifetime expected loss provision for all trade receivables/Advances. The company has computed expected credit losses based on a provision matrix which uses historical aredit loss experience of the Company. Forward-looking information (including macroeconomic information) has been incorporated into the determination of expected credit losses. Based on such information the company has evaluated that there is no provision required under expected credit loss model. Further, the company reviews on a periodic basis all receivables/advances having commercial/legal issues which require resolution against which specific provisions are made when found necessary

Reconciliation of loss allowance for Trade	USD			
Particulars	Year Ended	ar Ended 31 March		
	2020	2019		
Balance as at beginning of the year	8,348	26,928		
Additions during the year	24,707	8,348		
Amount of loss reversed / written back	(8,348)	(26,928)		
Balance at end of the year	24,707	8,348		

36 In respect of other financial assets, the maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of financial assets.

37 LIQUIDITY RISK

(I) Liquidity risk management

Liquidity risk is the risk that we will encounter difficulties in meeting the obligations associated with our financial liabilities that are settled by delivering cash or another financial asset. Our approach to managing liquidity is to ensure that we have sufficient liquidity or access to funds to meet our liabilities when they are due,

Maturity profile of financial liabilities

The following table shows the maturity analysis of the Company's financial liabilities based on contractually agreed undiscounted cash flows along with its carrying value as at the Belance Sheet date.

Particulars		Carrying amount in Balance sheet	Less than 1 Year	2nd and 3rd Year	4th and 5th Year	Above 6 years
As at 31 March 2020						- 1

As at 31 March 2019						10 C
Trade payables		4,184,618	4,184,618	-	-	
Other Financiel Liabilities		5,436	5,436		-	-
	TOTAL	4,190,054	4,190,054	-	-	

38 Sensitivity Analysis

Foreign Currency Sensitivity

The company is not exposed to significant foreign currency risks, accordingly changes in exchange rates are unlikely to have e material impact on the profits before tax and pre-tax equity.

Interest Rate sensitivity

The company is not exposed to significant interest risks, accordingly changes in interest rates are unlikely to have a material impact on the profits before tax and pre-tax equity.

39 Offsetting of balances: The Company has not offset financial assets and financial liabilities.

po q

40 Transition to Ind AS 116

The Company has adopted Ind AS 116 'Leases' effective 01 April 2019. The Company has followed the Modified Retrospective Approach and accordingly the Company has recognised a Right of Use (ROU) and equivalent lease liability. In view of this, the operating lease rent which was hitharto accounted under 'Other expenses' in previous periods has now been accounted as depreciation and finance costs.

The following is the summary of practical expedients elected on initial application: (i) Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date.

(ii) Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application.

(iii) Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application.

The weighted average incremental borrowing rate applied to lease liabilities as at April 1, 2019 is 4.14%.

The changes in the carrying value of right of use (ROU) assets for the year ended 31st March, 2020 are disclosed in Note 2.1.

41 Subsequent Events

The company has evaluated subsequent events through June 8, 2020, which is the date these financial statements were available to be issued, and has determined that there are no events requiring recognition or disclosure in these financial statements.
