

GMP Policy

To define, establish, maintain and improve the processes and procedures by validation

To maintain and continually improve the quality of facilities and equipment

To manufacture consistent quality products under controlled conditions and prevent from contamination

To integrate quality into design, products, testing, packing, packaging, labelling, storage, handling and delivery

To define, develop and demonstrate the competencies of employees

To conduct periodic audits for compliance and improvements

This policy has the commitment and ownership of each member in Galaxy for its effective implementation.

This policy will be reviewed periodically to ensure its alignment with corporate directions and suitability.
